AENO

SEASONAL

700W+

Energy-saving infrared heating technology

with low power consumption

up to 700+ Watts

Infrared heating panel with low power consumption - Up to 700+ Watts. The heater focuses its energy on heating the objects, not just the air around, making you feel warm.

A E N O

SEASONAL

Heat the room up to
30 m²

Infrared + convection heating method

Enjoy the convenience of smart even heating by choosing a heater for your flat, country house, office, restaurant, or hotel. Local heating

A E N O
SEASONAL

50%

Reduce heating costs by up to 50%

The AENO heater effectively uses the whole 700 Watts of power without wasting heat and money. Save your energy and money for the entire heating season up to 50%.

A E N O
SEASONAL

Odorless and silent No pollution, dust, and odors

An infrared electric heater AENO does not dry air or burn oxygen in the house. This retains the current humidity balance in the room for the whole family's well-being.

AENO heater works without air blowing and raising dust. It does not make pollutants, odors, and noise.

A E N O
SEASONAL

More efficient than other types of heating

Energy-saving infrared and convection technology makes AENO heater more cost-effective than most traditional heating systems such as air conditioners, gas heaters, central heating, underfloor heating.

A E N O
SEASONAL

Safe for children and animals

The heating panel automatically turns off when dropped. There is a sounding notification from the heater, as well as a message in the application.

If the heater falls down, it switches off automatically, starts alarming, and sends a push-up notification to the smartphone.

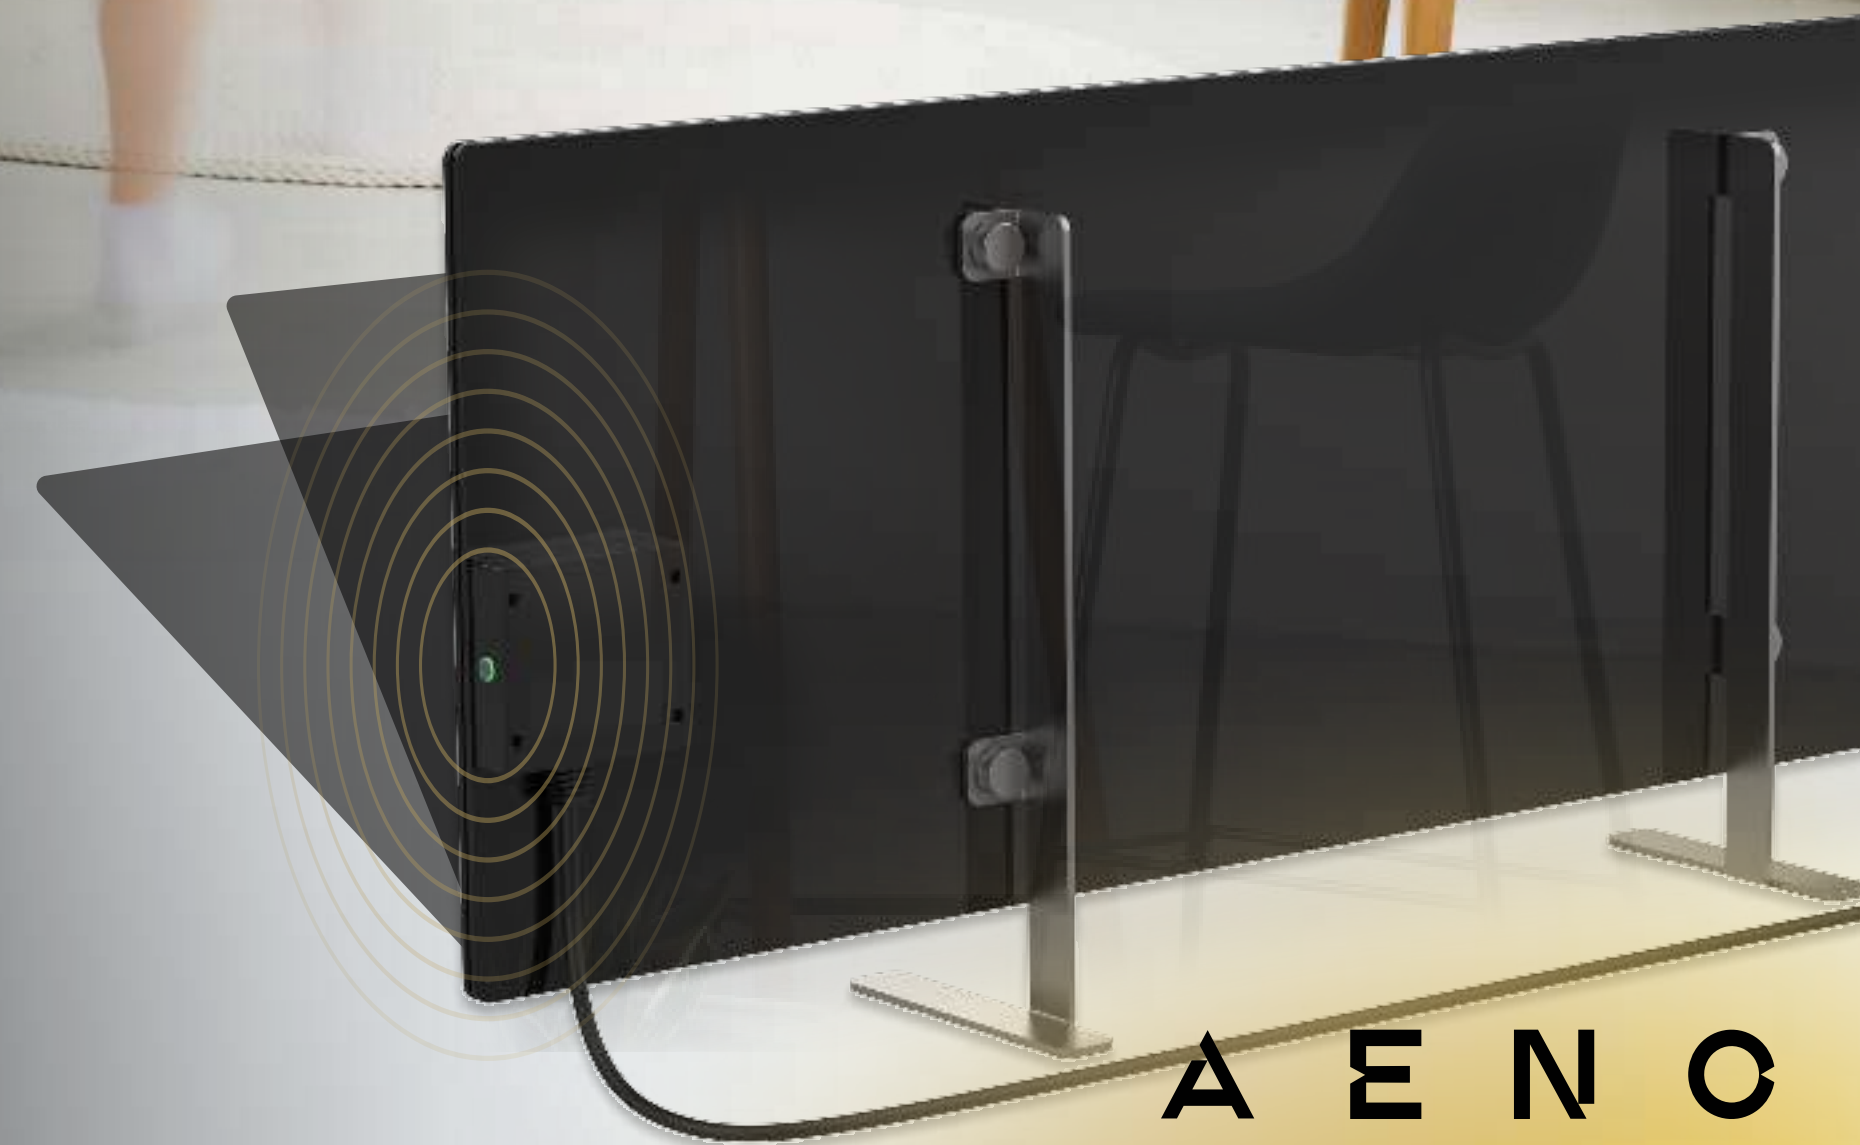

child-lock

safe for your
skin

A E N O

SEASONAL

At 60°C

Set & maintain a comfortable temperature to save energy

heating consumes only

160 Watts

compared to 700+ Watts at 120°C

This helps to avoid overheating and wasting energy. When you set the heater panel temperature to 60°C, it produces 160 Watts per hour, which is sufficient to keep the comfortable temperature in the room.

A E N O

SEASONAL

Control electricity cost via application

You can monitor current power consumption and energy saving as well as statistics for the period you choose. Adjust the house, hotel, restaurant and room heating and minimize your expenditures.

A E N O
SEASONAL

Operate from any place in the world

via user-friendly AENO App

Control the heater from the mobile app wherever you are:

- switch on/off
- set the temperature in the room
- create a heating scheduler
- make scenarios with multiple on/off heaters
- control of energy consumption
- setup devices from AENO ecosystems

A E N O
SEASONAL
